## DISPOSABLE EQUITAINER GUIDELINES

These new, disposable containers have proved quite serviceable for shipping semen. They are lighter in weight, less costly and convenient to use. Even though they are considered "disposable," we have found that they can be used several times and have come in quite handy in emergencies. Please do not believe that we are compromising the quality of your collection in any way by utilizing these containers. Therefore, please return these containers with the same diligence that we have asked for when we have sent the traditional equitainer, **hopefully, two to three days after use**. In returning this package, since the outer part is cardboard, please use taping it together at a minimum so as not to destroy the container by removing the tape.

**ITEMS ENCLOSED:** one or two disposable syringes containing the semen doses. These are to be thrown away after use and we do not expect them to be returned with the container. There will be a cool pack, used to keep the semen chilled. There is a divider between the cool pack and semen compartment. There is an outer cardboard container. Please pack the cool pack and the divider and mail container back to Checkerboard Farms securing the area where the container is opened with a closure of some kind.

### ITEM CHECKLIST:

- Outer cardboard container
- Cool Pack
- Divider between cool pack and section for semen
- Syringes
- Inner Lid for Container

**If any item is missing from this checklist upon arrival, please notify Checkerboard Farms Immediately. You are not responsible for any items not checked. If the Disposable Container is not returned in reusable condition, there will be a \$35 charge to the Mare Owner's account.**

## STALLION SHIPPING REPORT: WANDER 352

DATE	EXTENDER
ORIGINAL MOTILITY	# OF DOSES SENT
INSEMINATION VOLUME	PROGRESSIVELY MOTILE SPERM/DOSE
